

INSTRUCTIONS FOR USING THE DEMAGNETIZER

1. Turn on the demagnetizer just before using. Place material to be demagnetized in a plastic bag or other container on the surface of demagnetizer for 5 seconds, then remove.
2. Turn the demagnetizer off. Do not let it operate for over 5 minutes at a time as it will overheat.
3. Do not turn the demagnetizer off with material on the surface as this will magnetize it.
